

## CONCRETE SCREEDS

# HUSQVARNA BT 90

Art.no: 967 96 78 06

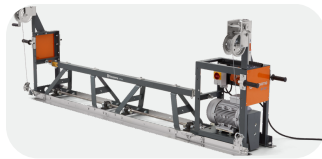

The Husqvarna BT 90 electric truss screed is engineered to handle floors, up to 20 meters wide, runways and bridges that need compaction, levelling and finishing. Easy to assemble by a single operator and adjust camber. Many configurations possible with accessories, such as winches and outriggers, to cover your day to day needs. Product photos are representative images. The exact model and specification of product may vary from country to country. Please contact your local dealer for the locally available products and features.

## FEATURES

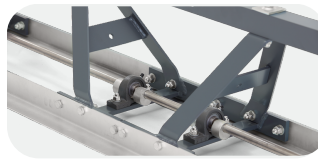

### Smart design

A precision turn-buckle allows to camber the screed sections independently.

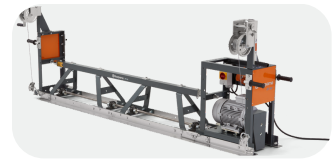

### Easy setup

Easy to assemble by a single operator.

### Engineered to last

Triangular frames, and square tubes provide better rigidity. Oscillating bearing with grease nipples extend the product life-time and serviceability.

### Built to perform

Low profile steel frame ensures durability. Low centre of gravity gives stability in low slump concrete.
